

## CAPS Statement General Version

I am a US Army veteran, with over 30 years of experience in the construction industry, and a registered and verified Federal Contractor. I have the capability to provide all Building Consulting and Project Management services needed for any Commercial or Residential construction project, either on land or water. I can provide services to include, but not limited to: Estimating, Building Consulting, Engineering, Photo Log production including Aerial, 3D imaging, Moisture Mapping, all CAT Mitigation and Reconstruction services, to inspect and/or evaluate the project or property for any requirements needed regarding Construction. I can also provide additional specialty areas like Foundation, MEPs, Lifts (elevators) and any other specialty construction craft necessary.

I leverage my skills and knowledge in project planning, project management, communication, 360-degree Complete Damage Analysis, Logistics, and a variety of estimating programs, skills, and technology, to offer a full-service construction consultative service for any type of project. Services for projects include repair and remodel, new residential and commercial, all restoration and mitigation services, and all CAT related services. I have successfully completed multiple projects for several clients across various sectors of CAT services, delivering quality work, timely results, and customer satisfaction with excellent communication. I have been involved in CAT projects resulting from hurricanes Ida in August of 2021, Beryl in July of 2024, Francine in September 2024, and Helene in October 2024, and several other CATs not listed here. I have extensive experience with mitigation damages for all types of property, including property on land or water, commercial or residential, to include public or government. I have had multiple interactions and worked with FEMA and other contractors within the same business sector directly for the last 15 years, throughout the United States.

I am also certified in Construction Management, Managing Up, Bluebeam, Procore, and Safety & Health, which demonstrates my commitment to learning and improving my craft. I am certified in Project Management (CPM), Professional Estimating (CPE), and a Construction Management Professional (CCMP). I am a team player and eager to collaborate with other professionals who share my vision and values. I currently have an inactive (T1-CAC) security clearance, and am looking for a sponsor, an active TWIC card and current passport. I can travel anywhere my services are needed or requested.
